

ABLESTONE® DESIGNER CONCRETE

*Key information for designers,
builders and concreters.*

Ablestone®
It says you

Experience the romance of stone.

'Designer' is a term most often applied to luxury goods - cars, clothing, and other personal accessory items, often sold under a prestigious brand name. Ablestone Designer Concrete is no exception, yet it is more than just a luxury product, it is also very personal, unique, and romantic to boot.

'They' say romance is a sensation of excitement and mystery associated with love. Imagine yourself bare-footed, on your luxurious, silky, cool, polished concrete floor.

From inner-city semi to Harbourside pad, let Ablestone stimulate your senses in a way few other materials can, delivering serene elegance and cool atmospherics to almost any space.

Think outside

Ablestone Designer Concrete is not only for internal polished floors, it is also the perfect material for driveways, pathways, alfresco living areas, even benchtops, tables, and seating.

It can be finished for multiple roles such as gripping toughness to cope with heavy vehicle traffic or honed for non-slip safety and a tactile sensation underfoot.

Make it personal

Create a mix to suit your unique taste. This is achieved by combining different stone, with sands and colour oxides to create something unique.

There is literally an infinite number of bespoke mix designs that can be brewed to tell your personal story so that it says your neighbourhood, your lifestyle, your home, you.

Choose from our most popular mixes or talk to us about creating a specialty mix.

Avalon White

Bondi Pacific

Bronte Rocks

Fairlight Dawn

Little Bay Blend

Manly Twilight

Mountain Light

Newport Sand

Paddington Mix

Starry night

The Coast Mix

Choose Ablestone Designer Concrete with confidence:

- We help you select your mix and find a quality concrete installer and can provide guidance on planning your job and preparing your site
- Our designer range comprises specialty products and architecturally specified mixes
- We offer a variety of aggregates for exposed applications, coloured oxides for designer coloured concrete, and off-white cement
- We specialise in small loads and tricky pours - even those requiring transport by water
- We will save you time, labour and money by mixing your required concrete faster and more cost effectively than you can do it yourself
- We have a range of different sized trucks (depending upon the plant) to cater for your order:

2.0m³

3.0m³

Maxi Truck
