Note: Ash fraction results were not provided by the laboratory during the collection in February and April 2026. This does not constitute a non-compliance nor an incident as, in accordance with Condition 17 of Schedule 3 of PA10_0183, deposited dust is assessed as insoluble solids.

Note 2: Results from the July collection from Myrtle Street are acknowledged to be unusually high. However, as the rolling annual average remains within the criteria, it is not considered a non-compliance nor an incident.

*Project Approval (PA 10_0183) outlines the annual average PM_{10} criteria to be 30$\mu g/m^3$. However, EPL 536 Condition R4.5a) requires that the air quality monitoring data is assessed against the Air Impact Assessment Criteria outlined in EPA's *Approved Methods for the Modelling and Assessment of Air Pollutants in NSW*. The most up to date version of this guideline was published in 2022 and outlines the annual average PM_{10} criteria to be 25$\mu g/m^3$. Metromix has considered both criteria for its review of particulate matter monitoring.

Comments

All PM10 results remained below the approved criteria for the sample period.

Comments

All water monitoring results remained within the approved criteria levels during the monitoring period.It is noted that the Electrical Conductivity (EC) of the sample taken from EPL Point 4 on 1 September 2026 is slightly elevated compared with the ANZECC Water Quality Guideline Limits. However, this does not constitute an incident nor a non-compliance as there is no EC limit within EPL536 or PA 10_0183. As water from EPL Point 4 is reflective of the groundwater environment rather than impacts/discharge from the Quarry, EC should continue to be monitored to identify any trends in the baseline groundwater environment.

Blasting Criteria

Parameter	Units of Measure	Limit	
		95% of blasts per year	100% of blasts
Airblast Overpressure (Linear Peak)	decibels (dBL)	115	120
Ground Vibration (Peak Particle Velocity)	millimeters per second	5	10

Comments

Two blasting events occurred within the monitoring period and all monitoring results were within the approved criteria.
